

In this article I'm going to talk about region to block feature.

1. This feature is available in Extras model so e has to enable it.
 - a. Go to structure > Display suite and then select Extras from top right side of the browsers screen.
 - b. Go to Other Block and Enable it and save the Settings.

2. Using this we can show other region in the page like header, left, right and footer.
3. So, go to structure > display suite click on manage display for article.
4. Click on the full content from top right side of the screen.
5. Scroll down the page and you can see that there is a one tab Called **Block region** click on it.
6. Let's add region called info and save it.

7. And you can see there is new region called Info is created.

8. Let's move author and post date into the info region. And also enable the labels.
9. Let's add some other field into in info region. So add Category in to info region and enable label.

The screenshot shows the Drupal field configuration interface. The 'Info' region is highlighted with a red box. It contains three fields: 'Author 2 (Original: Author)', 'Post date', and 'Category'. Each field has a 'Region' dropdown set to 'Info' and a 'Label' dropdown set to 'Inline'. The 'Format' column shows the field type (Author, Long, Link) and the 'Field template' is set to 'Drupal default'.

FIELD	REGION	LABEL	FORMAT
Image	Right	<Hidden>	Image #
Comments	Footer	<Hidden>	Default
Author 2 (Original: Author)	Info	Inline	Author
Post date	Info	Inline	Long
Category	Info	Inline	Link
Read more	Disabled	<Hidden>	Default

10. Save the settings.
11. Now we created one block called info we have to enable it from structure > blocks. Otherwise it not effect.
12. So go to structure > blocks and find new block called info and click on Configure li
 - a. Give name to block (e.g. Article info).
 - b. Also open dropdown box under default theme.
 - c. Select Sidebar first.
 - d. Save the settings.
13. Go to article page refresh the page. You can see that there is out block is displaying on left sidebar.
